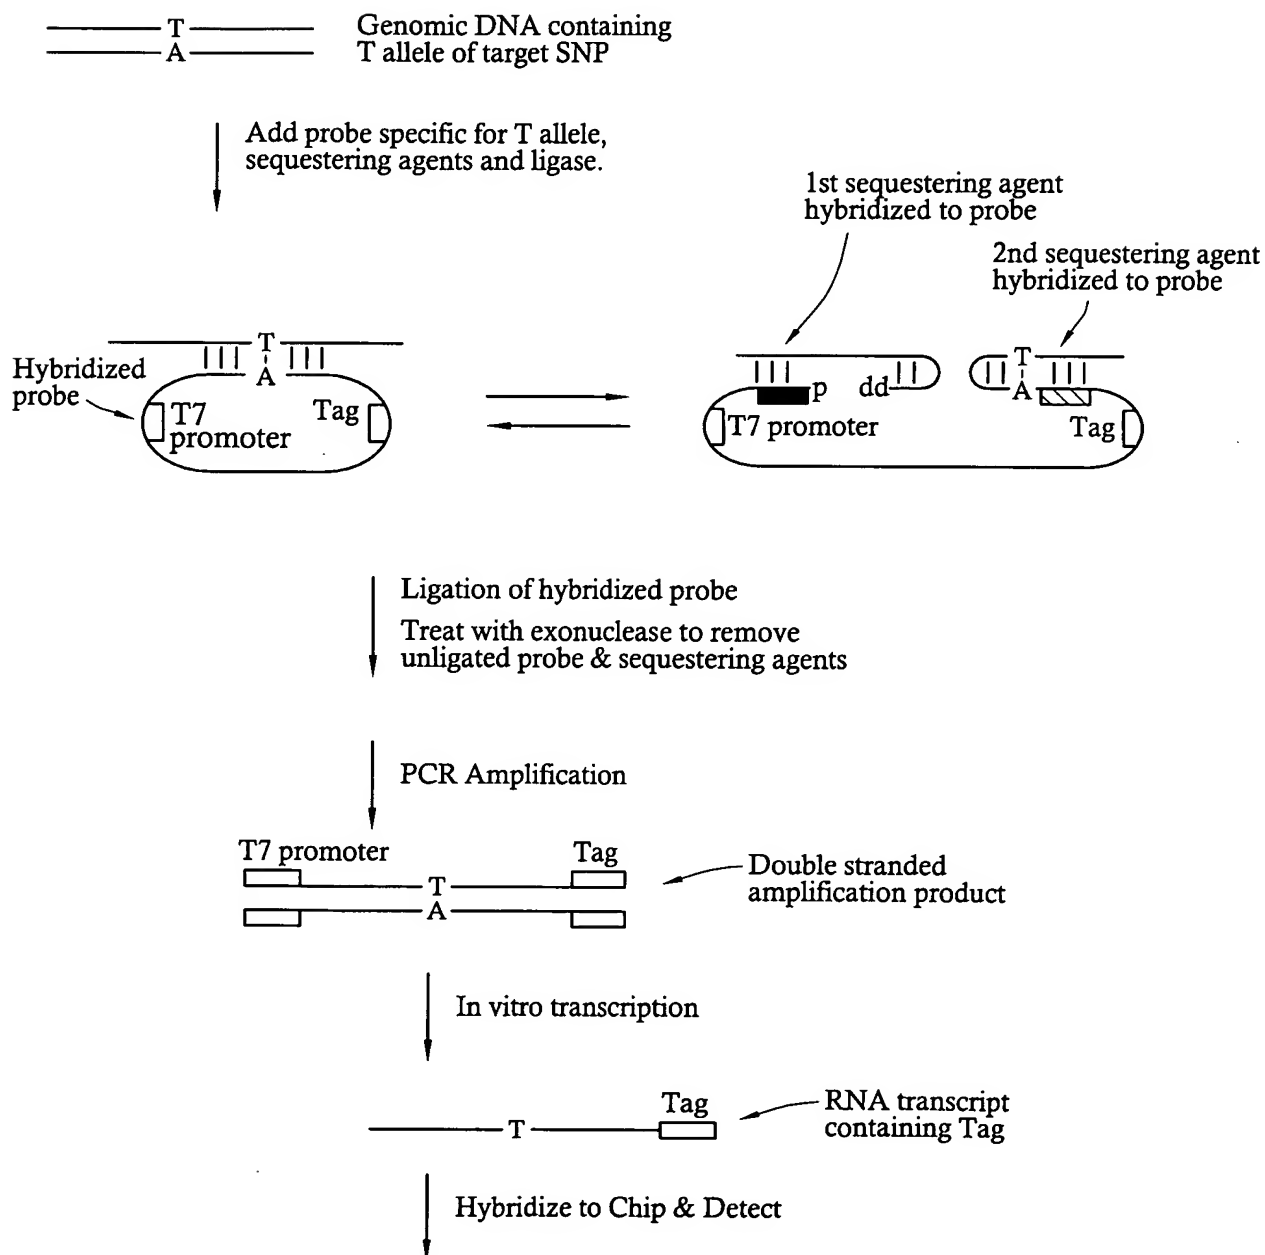

FIG. 7

OLIGONUCLEOTIDE SEQUESTERING AGENTS AND METHODS
OF USE

Donald M. Crothers

Appl. No.: Unknown Atty Docket: GENOM.032NP

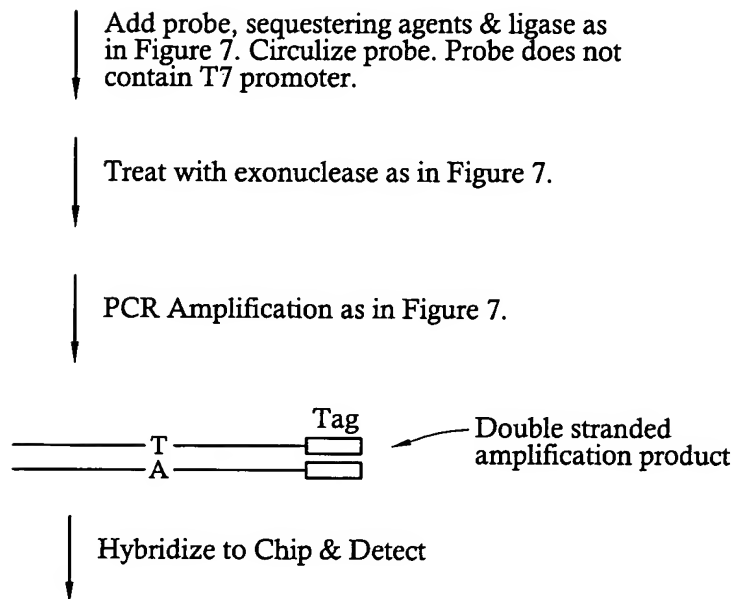

FIG. 8

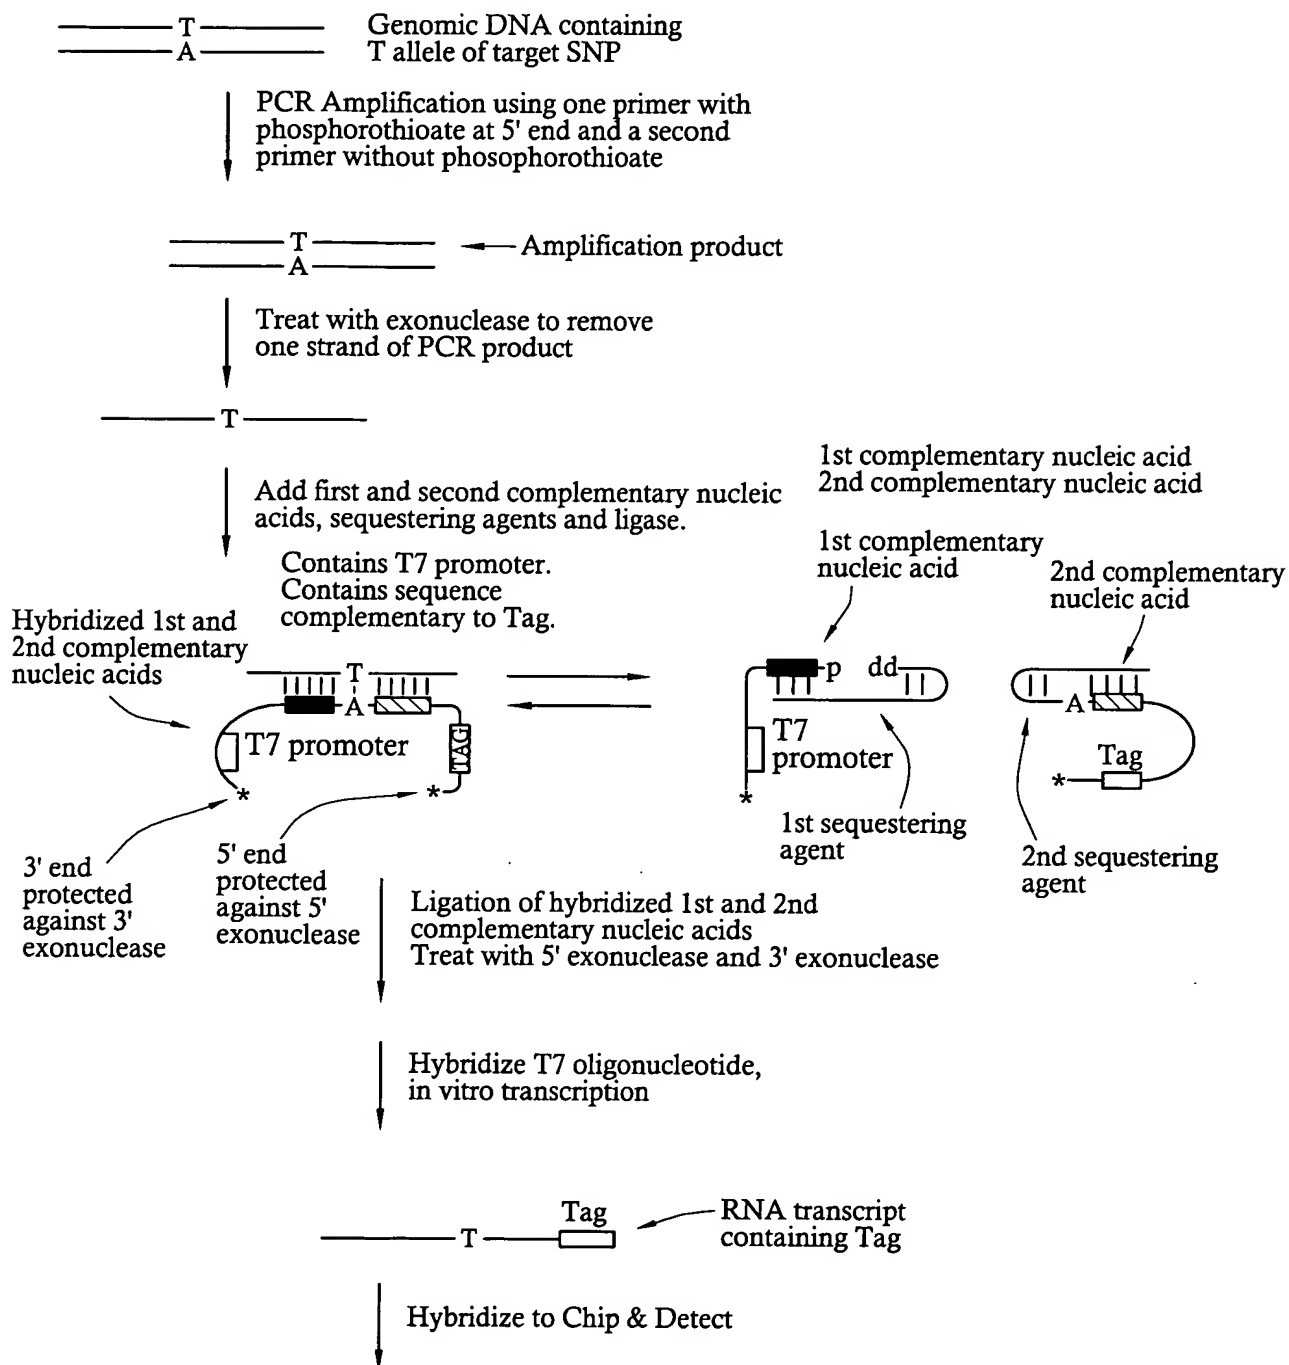

FIG. 9

PCR Amplification using one primer with
phosphorothioate at 5' end and a second
primer without phosphorothioate as in Figure 9.

Treat with exonuclease to remove
one strand of PCR product as in Figure 9.

Add first and second complementary nucleic acids,
sequestering agents and ligase as in Figure 9. 1st
complementary nucleic acid does not contain T7 promoter.
